

Videoclip Module 6

Module 6 COMING FULL CIRCLE

1. THE DAWN OF THE POST EGOISTIC ERA

Nature **evolves humans to be capable of interacting** and organizing with the same inclusive care that it does. Now in the 21st Century it's no longer merely [Abraham's](#) ideology about man's connection to the law of nature, it's the **demand of our new reality**. More than ever we need to learn and apply it in a practical way **if we and our planet are going to survive.**

We don't know **HOW** to live like this

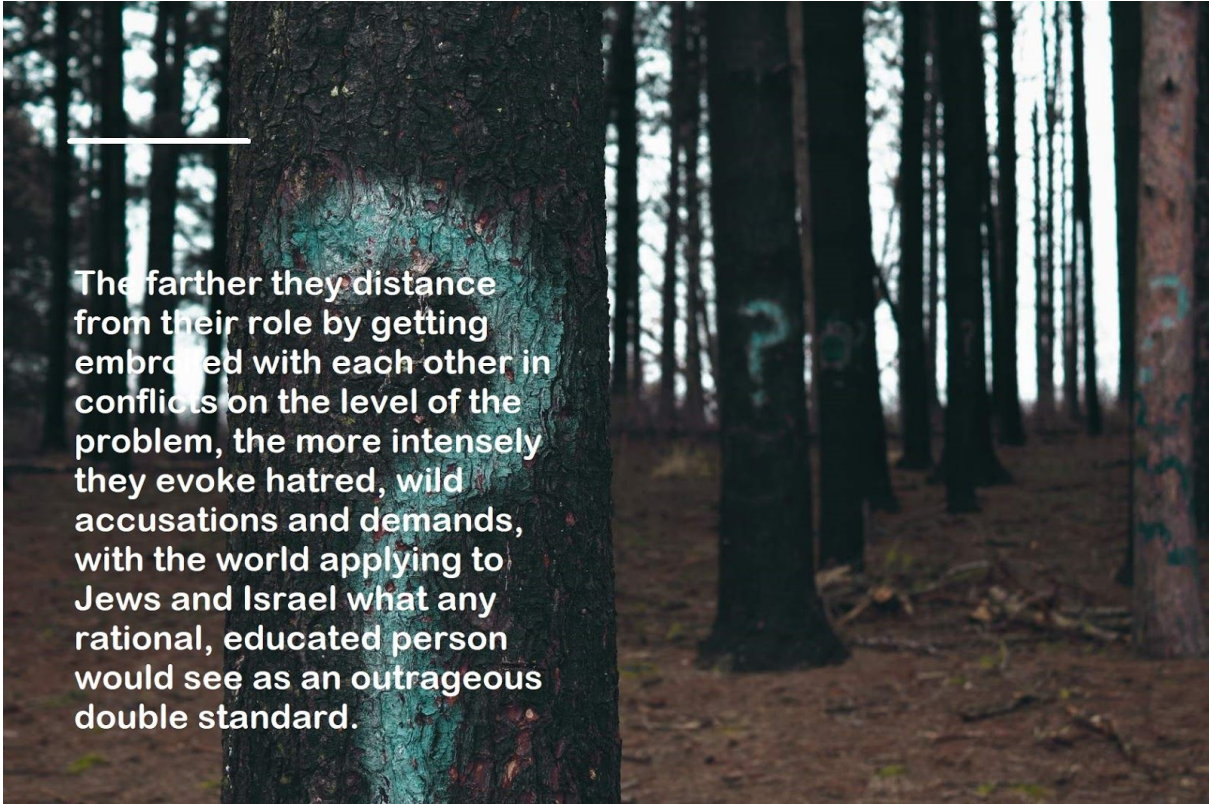

How is it even possible to manage such a complex set of needs? How will we be able to take care of ourselves? The dawn of The Post Egoistic Era has us frozen in our tracks passively waiting for the conditions around us to change and move us out of this deadlock. Yet every day it's getting clearer that external conditions won't change for the better on their own and there's no way to separate from each other like we did 4000 years ago - we're going to have to change.

We don't know **WHAT** to change

Because we're still looking at only one side of the force that's developing us, without realizing that it's always been balanced by another side that we couldn't see.

—

Are Jews providing the balance? Where are they?

The farther they distance from their role by getting embroiled with each other in conflicts on the level of the problem, the more intensely they evoke hatred, wild accusations and demands, with the world applying to Jews and Israel what any rational, educated person would see as an outrageous double standard.

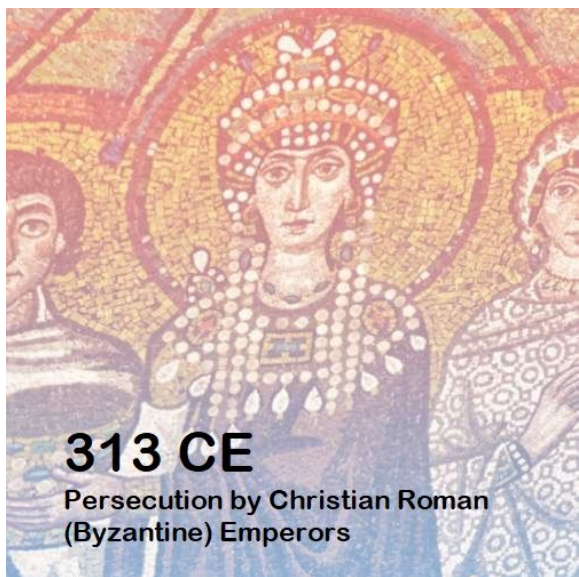

The thing is - it is in fact a single standard but a much higher one...

...something we feel when we hit a crossroads in our development, a built in alarm goes off in the world. Every Node feels there's something wrong and demands what's missing. We're subconsciously triggered by the network to send alarm signals pinging the Hubs to make them wake up and operate...

2. HISTORY REPEATS ITSELF

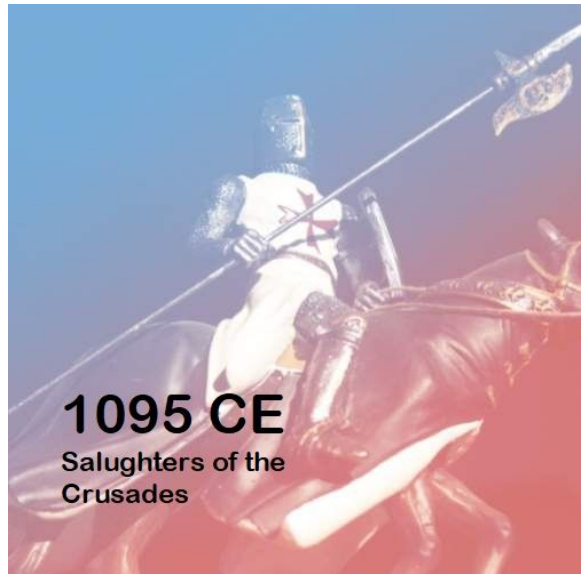

When Jews act collectively as a **catalyst for unity**, even among themselves, their relationship with the world and the nations they live in is **peaceful** and **beneficial**. When they don't, their disunity brings about **violence**, pogroms, expulsion—all those expressions we collectively term **Anti-Semitism**.

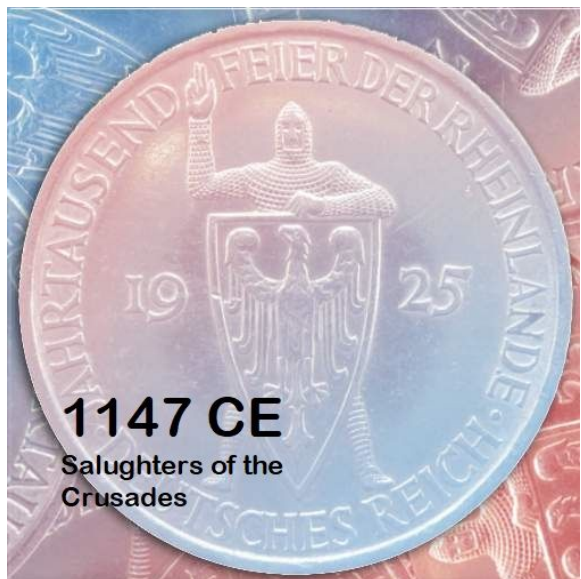

636 CE

Genocide and
sujugation by Islam

Salughters of the
Crusades

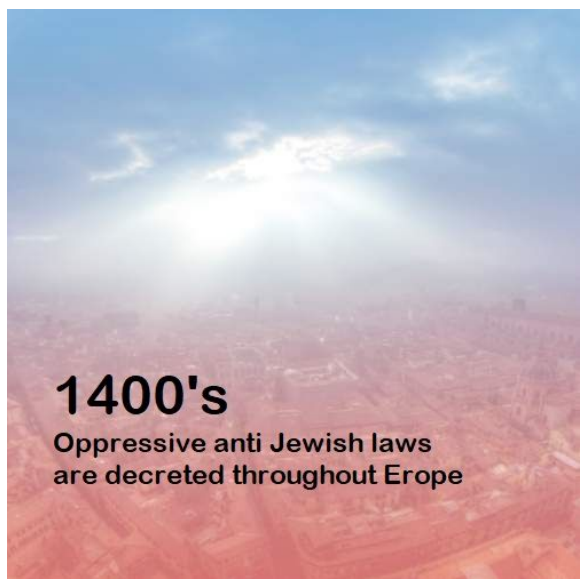

1147 CE

Salughters of the
Crusades

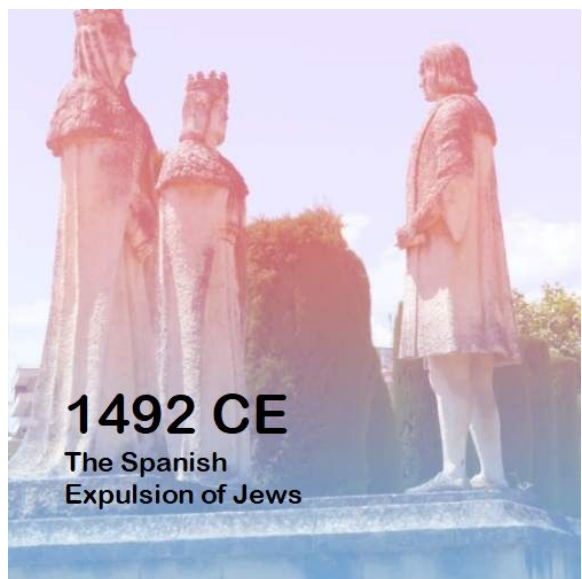

1290 CE

Expulsion from
England

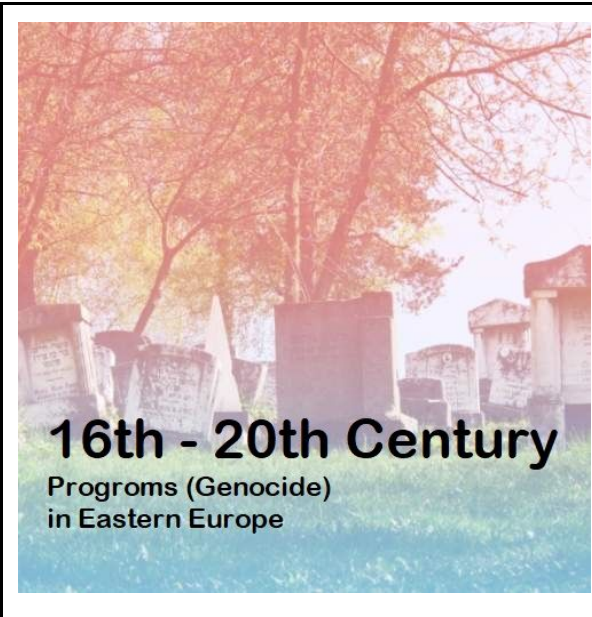

1400's

Oppressive anti Jewish laws
are decreted throughout Erope

1492 CE

The Spanish
Expulsion of Jews

In the past few years alone...

Violence against Jewish communities in Europe

The BDS movement

Program of delegitimization of the State of Israel by the UN

Call for annihilation of Jews by strains of Islam

Rejection of Jews in progressive movements in the US

Marginalization of Jewish students on University Campuses

With 20th century secularization

Jews lost touch with what they are. Even observant Jews have little awareness of what their texts are trying to educate them about. They, too,

have bought into the definitions of Jews the world gave them and are just trying to live a comfortable life for their own benefit—like everyone else—and protect themselves from persecution, without understanding what they really should be doing.

For the people of the original "United Nations" secularization isn't about turning away from religious observance or morality, it's the ignorance of, and absence from, their natural role.

The conscious threats and actions against the Jews are often brutal and violent but the subconscious dialog is aimed at our heart:

Jews:

What do you want from us!
Look at all we contribute to humanity with science,
medicine, technology and art!

World:

Well we're not even taking that into account.
We can do all that ourselves.
We expect a lot more of the people of Israel!

Jews:

What do you expect!?!

World:

We expect you to be a "light unto the nations,"
to act out of unity and mutual responsibility,
to stop the hatred between you and provide the example
of how to live together in this new reality
where we can't live apart.

3. SYNTHESIS 6

Networks in nature

The network is at a critical point in its evolution but the Hubs aren't exactly fulfilling their role

Jews and humanity

Jews and humanity have once again reached a state similar to Babylon. Jews aren't fulfilling their training and the surge in Anti-Semitism is a measure of that.

Synthesis 6

DYNAMIC EQUILIBRIUM

Because it's made of immutable laws, the system of nature will stop at nothing to bring itself into balance. The conscious threats and actions against the Jews are often brutal and violent but the subconscious dialog is aimed at our heart.

What if?

Imagine what the world would be like if the Jews and everyone else wanted to know and fulfill their role in the system of nature?
